SOLUTIONS FOR HOTELS AND STAFFING COMPANIES

Are you a hotel, contract labor company, staffing organization, professional services group or a growing business with multiple branches?

If so, we can show you how to cost effectively manage, control and view in real-time your direct labor costs by using our ATIT solution!

Key issues faced by organizations today:

- ◆ Spend more time on clerical & administrative activities rather than managing associates, selling, marketing or working on customer relationship development.
- ◆ Inability to effectively manage and utilize labor pool as data available is not real-time. Cannot measure performance standards.
- ◆ Difficulty providing clients appropriate job resource.
- ◆ No simple means to provide clients with labor expended by “cost center or department” on a real time basis.
- ◆ Labor capacity planning issues makes it difficult to respond to changing market needs which create inefficient labor variances.

How ATIT Solves these issues: ATIT is a revolutionary time management application that is based on the SaaS

(Software as a Service) model. It accomplishes the following:

- ◆ Employees /contract labor associates are easily setup on the system.
- ◆ Companies can use a host of “smart” technology mobile devices in place of the old time-clocks to capture labor hours & productivity.
- ◆ Data is available in real-time mode by customer, job or cost center.
- ◆ Users have the ability to review & manage employee activities from virtually any mobile device or internet connected PC.
- ◆ Maximize efficiencies and profits by catching and correcting errors and more importantly by improving labor productivity.
- ◆ Quickly generate time and labor utilization reports for management.

Why Consider ATIT?

- ◆ **ATIT** makes time clocks and other devices obsolete. Instead a simple web portal & mobile device makes data capture a breeze.
- ◆ **ATIT** immediately reduces your direct labor and management costs. Every customer and user has immediate benefits.
- ◆ **ATIT** uses SaaS model so there are no up-front costs or fees!
- ◆ **ATIT** can be integrated with your present payroll systems.
